National Grand Champion: 3 & 4 place \$50.00 each

National Amateur Grand Champion: 3 & 4 place \$50.00 each

Please contact Deb Freidus – blackthornpt@earthlink.net

As soon as possible

APC DELEGATES REPORT

AKC Delegates Meeting / September 9 and 10, 2019 / Newark, NJ

September 9, 2019 Committee Meetings

Attended:

- Dog Show Rules
- Field Trial and Hunt Test
- Canine Health

Key Items:

Dog Show Rules Committee:

- > Chapter 11, Section 9 concerning Health of Dogs at conformation shows
- > Inoculation requirements which will be broader inclusive on “non communicable diseases”
- > Clubs will be provided Health Resources which will be more specific than general
- > Health Requirements for Field Events come under the Field Trial and Hunt Test Events, Committee, Chapters 10 & 16

Field Trial and Hunt Test Committee:

- > Breed sustainability / How to get good breeders to breed more dogs to increase sustainability
- > 8.2 million dogs are needed to meet purebred dogs’ sustainability
- > Committee wants to work with AKC to develop good breed club mentoring programs
- > “Purpose Bred” was also discussed
- > Concern of the increase of deaths and injuries from dogs coming into contact with various seeds such as Foxtail and Canadian Sheet Rye

Canine Health Committee:

- > Sustainability was discussed as was the relevance of semen collection and concern that well established breeders with good stock are aging and many have no provisions to maintain the frozen collections after the breeders are deceased.
 - > The OtterHound Club of America (which is a very low registered breed) is concerned about sustaining the breed and is establishing a 501c3 Foundation to hold donated semen from individual’s estates.
 - > Purina Weight Program circles can now be scanned
- September 10, Legislative Caucus & Delegates Meeting

Legislative Caucus:

- > AKC National Legislative Meeting last June in Wash. DC was a great success.
- > AKC is concerned with activist groups and disruptions at events
- > US is importing Detection Dogs when there are many in the US that can be trained for the same purpose.
- > Labrador Retrievers are the largest % of imported.
- > AKC is working with the Department of Defense to provide outreach for domestic detection Dogs.
- > 1 million dogs are imported each year
- > Blood and vaccination certificates will be required for importing dogs
- > USDA will maintain CIV or Certificate of Veterinary Inspection

Delegates Meeting:

Very short meeting with the majority of business electing new committee members. Forum presented by Doug Johnson and William Shelton on “Sustainability” and how to better market and sell puppies.

Next meeting will be December 12 and 13th in Orlando just before the AKC National Championship Show.

Minutes of the September 2019 Delegates meeting minutes can be viewed in their entirety via:

www.akc.org

Respectfully submitted,

Danny D. Seymour, APC Delegate

Below is the second in the series of discussion of the Pointer Standard by Susan Bleckley, Chair of the Judges Education Committee. Comments on this or any of Susan's discussion can be sent to

TalkingToThePoint@gamil.com All comments are welcome

Welcome back I've turned the direction to movement

~~You will notice that the standard does not address converging. A~~ The Pointer is a medium sized dog that converges (toward the center line) as it moves faster. Our breed has no anomalies such as in the Bully Breeds. I've observed that their movement is the same as many Sporting breeds except for some very specific descriptions from the standard.

STANDARD

COMMENTS

MOVEMENT KEYS from the standard.

OPENING PARAGRAPH:

the head noble, proudly carried;
the muscular body bespeaking both staying power and dash.
the desire to go

Head carried higher than body
In good physical condition
Alert and ready to roll

FRONT:

Elbows well let down, directly under the withers and truly parallel
as to work just clear of the body.

If the legs must work clear of
the body then they have to be
set more towards the outer side
and not pinched under.

Chest, deep rather than wide, must not hinder free action of forelegs.

This would lean towards not
barrel nor a large post sternum

Both, Clear of the Body & Free Action of Forelegs, while doing his job the Pointer will be at a gallop.

HINDQUARTERS:

Muscular and powerful with great propelling leverage.

Greatly desired but balance first
between the front and rear for this
to be accomplished.

GAIT:

Smooth, frictionless, with a powerful hindquarters' drive.

2nd time hindquarters are
mentioned using propelling and
powerful

The head should be carried high the nostrils wide

2nd noble, proudly carried & high

The tail moving from side to side rhythmically with the pace,

*An important feature of the Pointer
Which is very unique.* The balance of the
pointing breeds have primarily docked tails.

giving the impression of a well-balanced, strongly-built hunting dog
capable of top speed combined with great stamina.

If you have witnessed a Pointer in the Field
This statement can be appreciated. In the show
ring with such controlled circumstances it is
more difficult to imagine.

Hackney gait must be faulted.

The photos on the next two pages were sent from Ted Blasche. They represent several of the items that Karen had collected over the years. Ted is selling her collection. If there is something you are interested in, please contact Ted Blasche directly at

blaschet@aol.com

More items will be posted next month.

You can also find items for sale on Facebook. See Karen Blasche Collection
